SAVE LIVES**

IMPACT REPORT

MAY 2021- JULY 2021

HOW IT STARTED

In early March 2021, India's Health Minister Harsh Vardhan declared the country was "in the endgame" of the Covid-19 pandemic.

By mid-April, the country was witnessing 100,000+ cases a day, with Kolkata contributing to 20,000+ cases daily. Cry for help on social media, large crowds outside hospitals and long queues at the cemetery were testimony to the fact that India's health infrastructure was crumbling due to the second wave.

To support our city in these adverse times, **Kolkata Gives** initiated the '**Help Us Save Lives**' campaign and ended up increasing 150+ beds at 15 centers in West Bengal, in addition to distributing **10,000 Covid treatment medical kits for free** to the underprivileged.

The medical equipment donated **will continue to serve patients and hospitals in the times to come.**
